AMENDMENTS TO THE CLAIMS:

1	1. (Curren	ntly amended)	A nonwoven fabric comprising at least two separate		
2	but interconnected layers, sai	but interconnected layers, said fabric comprising hydroentangled and consolidated fibers in each			
3	of the layers as well as being provided with discrete interconnections so as to provide discrete				
4	voids between the two layers of fabric.				
1	2. (Curre	ntly amended)	The nonwoven fabric according to claim 1		
2	characterised characterized in	that the voids of	comprise a channel within the structure of the fabric		
1	3. (Curre	ntly amended)	The nonwoven fabric according to claim 1		
2	characterised characterized in	that the voids of	comprise a plurality of channels.		
1	4. (Curre	ntly amended)	The nonwoven fabric according to claim 2		
2	characterised characterized in	that the channe	els have a substantially cylindrical or tubular shape.		
1	5. (Curre	ntly amended)	The nonwoven fabric according to claim 1		
2	characterised characterized in that the voids are arranged in a substantially uniform or periodic				
3 .	manner.				
1	6. (Curre	ntly amended)	The nonwoven fabric according to claim 1		
2	characterised characterized in that the thickness of the nonwoven fabric is from 1 mm to 9 mm.				
1	7. (Curre	ntly amended)	The nonwoven fabric according to claim 1		
2	characterised characterized in that the area density of the nonwoven fabric is from 40 to 300				
3	g/m^2 .				
1	8. (Curre	ntly amended)	The nonwoven fabric according to claim 1, wherein		
2	the voids comprise discrete channels within the body of the fabric.				
1	9. (Cance	led)			
1	10. (Curre	ntly amended)	The nonwoven fabric according to claim 2		
2	characterised characterized in that the width of the channels are in the range from 0.2 mm to 8.5				
3	mm				

(Currently amended) The nonwoven fabric according to claim 1, wherein 1 11. 2 said voids further comprise one or more functional materials. (Currently amended) The nonwoven fabric according to claim 11 1 12. characterised characterized in that the functional material is a member selected from a yarn, 2 3 filament, wire, wax, gel, liquid, pulp and particle. 13. (Currently amended) The nonwoven fabric according to claim 1, wherein 1 in which the separate but interconnected layers are formed from a member selected from carded, 2 3 air-laid, wet-laid, spun-laid and meltblown webs and combinations thereof. (Currently amended) The nonwoven fabric according to claim 1, wherein 1 14. the layers are fibrous, and wherein at least two fibrous layers are made of different fiber fibre 2 3 types. (Currently amended) The nonwoven fabric according to claim 14, 1 15. 2 wherein in which at least one fibrous layer is hydrophobic and at least one fibrous layer is 3 hydrophilic. 1 16. (Currently amended) The nonwoven fabric according to claim 12, 2 wherein the functional material is a member selected from a yarn and a filament and said yarns and filaments are made of a member selected from natural, man-made and mineral fibres. 3 1 17. (Currently amended) The nonwoven fabric according to claim 12, 2 wherein the functional material is a liquid and said liquid is a member selected from cleaning 3 liquids, detergent liquids, paints, perfumes, cosmetics, lotions, ointments, antioxidants, liquid 4 nutrients and creams. 1 18. (Currently amended) The nonwoven fabric according to claim 12, wherein the functional material is a powder and said powder is a member selected from 2 3 superabsorbents, cleaning agents and medicaments. (Currently amended) The nonwoven fabric according to claim 12, 1 19. 2 wherein the functional material is a particle and said particle is a member selected from a material called Silica silica gel, activated carbon particles, metallic particles, ceramic particles, 3

polymer particles, phase change material (PCM) particles and seed particles.

4

1	20. (Currently amended) The nonwoven fabric according to claim 12,			
2	wherein the functional material is a wire and said wire is a member selected from electrically			
3	conductive wires, shape memory alloy (SMA) wire and optical wires.			
1	21. (Currently amended) The nonwoven fabric according to claim 12,			
2	wherein the functional material is a gel and said gel is a member selected from hydrogels,			
3	medicinal gels and hygienic cleaning gels.			
1	22-32. (Canceled)			
1	33. (Currently amended) The nonwoven fabric according to claim 1			
2	characterised characterized in that the nonwoven fabric is suitable for the controlled release of			
3	one or more medicaments.			
1	34. (Currently amended) The nonwoven fabric according to claim 1			
2	characterised characterized in that the nonwoven fabric is suitable for containing or delivering			
3	one or more cleaning fluids.			
1	35. (Currently amended) The nonwoven fabric according to claim 1			
2	characterised characterized in that the nonwoven fabric is in the form of an absorbent article.			
1	36. (Currently amended) The nonwoven fabric according to claim 35.			
2	wherein the absorbent article is a member selected from a wipe, a wound dressing, a baby diape			
3	component, an incontinence pad, and a feminine hygiene absorbent pad.			
1	37-40. (Canceled)			
	41. (Currently amended) The nonwoven fabric according to claim 1			
	characterised in that, wherein the nonwoven fabric is suitable for light-weight thermal insulation			
	42. (Currently amended) The use of the a nonwoven fabric according to claim			
	1 in the manufacture of an article.			

43. (Currently amended) The use according to claim 38 42 wherein the article is a member selected from a medicament delivery device, a cleaning fluids delivery device, an

absorbent article, a wipe, a wound dressing, a baby diaper component, an incontinence pad, a feminine hygiene absorbent pad and a thermal insulation material.

- 44. (Previously presented) A method of delivering a functional material which comprises the use of the nonwoven fabric according to claim 1.
- 45. (New) The nonwoven fabric according to claim 1 wherein the voids are coated with a vapour permeable PU polymer.
